Hauganes has a special place in our hearts

We come from many generations of fishermen, born and raised here in Hauganes and have ourselves sailed the beautiful seas of Eyjafjörður fjord and around Iceland since in our teens.

The magic of the sea never ceases to amaze us, especially when we can wake up in the morning by the sound of blowing whales just a few minutes from the shore.

It will be our pleasure to have you as our guest and take you on our classic oak boats for a carbon neutral whale watching tour to remember from the village we all love.

Hauganes

Hauganes is a small fishing village on the northwest side of Eyjafjörður fjord. A typical seaside village for this area, Hauganes is renowned for its beautiful natural environment and for its fishing industry which has been at its core for centuries.

Hauganes is a retreat for those of us who long for peace and quietness.

Listening to the ocean, the seabirds, the wind. The natural elements bring us tranquility we miss so much from our busy lifestyle. Hauganes will embrace you and help you find your inner voice and peace of mind.

Whale watching Hauganes

We are the oldest whale watching tour operator in Iceland and started our regular tours back in 1989 when we allowed our guests to try their luck in sea angling. In 1993, when the whales started showing up in Eyjafjörður fjord in more numbers, it marked the beginning of our whale watching tours.

Our crew

An old Icelandic saying goes, **“Peir fiska sem róa,”** meaning: **“In order to catch fish, you need to row.”** Our crew consists of professional fishermen and certified guides with decades of experience when it comes to fighting the elements and sailing the waters around Iceland. No worries though, **Eyjafjörður fjord is very calm during the summer season and well sheltered from the North Atlantic currents.** Our guides are fully trained and certified and will ensure that you will have a comfortable and informative tour.

Our oak boats

We operate two classic Icelandic oak boats, Niels Jónsson EA 106, a 17,5m fishing boat, built of oak in 1974 and Whales EA 200, is a 21,5m fishing boat built in 1954. Both boats have enjoyed good maintenance, and are spacious, comfortable and extremely stable. As there are no generators on board **the engines can be turned off when approaching the whales** making the approach as gentle and nonintrusive as possible.

They are true beauties to behold and sail!

You will find more information on Hauganes, our company, crew and boats on our homepage www.whales.is.

Whales ahoy!

We depart from Hauganes harbor in the heart of Eyjafjörður fjord.

Our tour will quickly immerse you in the midst of the whale populations and rich sea life characteristic of the area. Whether the whales have ventured deep into the fjord or stay closer to Hrísey, they are always just a short trip away from Hauganes.

Enjoy a comfortable ride on our two classic Icelandic oak boats while observing the fantastic scenery, birdlife, and of course the diverse range of whale species of Eyjafjörður fjord.

Commonly, we see Humpbacks, Minkes, Harbour Porpoises, and White-beaked Dolphins. If you're lucky, you may even catch a glimpse of Orcas or Blue Whales! Enjoy a little sea angling on the return trip.

- 98% success rate May-Dec 2021
- Scenic view
- Rich birdlife
- Sea angling for those interested

Book your tour through www.whales.is and enjoy a 10% online booking discount in the process!

Hvalaskoðunar FERÐIR

Hvalaskoðunin á Hauganesi er elsta hvalaskoðun landsins og er staðsett í hjarta Eyjafjarðar. Við gerum út tvo klassíska íslenska eikarbáta sem þykja einkar stöðugir og þægilegir. Allar ferðir eru kolefnisjafnaðar sem felur í sér að við gróðursetjum tré fyrir hverja ferð til að vega upp á móti kolefnisútbæstri ferðarinnar, ásamt því að við blöndum olíuna með lífdísli. Sumarið 2021 sáum við hvali í 98% okkar ferða, þar á meðal hnúfubaka, hrefnur, hnísur, háhyrninga og steypireyðar. Hvalirnir voru að meðaltali í 20 mínútna fjarlægð frá Hauganesi og því stutt að berja þessar fallegu og jafnframt tignarlegu skepnur augum. Við hlökkum til að taka á móti þér!

Whale watching TOURS

Whale Watching Hauganes is the oldest whale watching tour operator in Iceland. Located in North Iceland, in the heart of Eyjafjörður fjord, we operate two classic Icelandic oak boats, which offer an extremely comfortable and stable ride. All our tours are carbon neutral, i.e. we plant one tree for each whale watching tour, to compensate for the amount of carbon equivalent to our emissions. Besides, our oak boats run partially on biodiesel made from recycled cooking oil. In the summer of 2021, our sighting success rate was 98%, including Humpbacks, Minkes, Harbour Porpoises, Orcas and Blue Whales. The whales can be reached in approximately 20 minutes sailing time from the village of Hauganes. You will not wait long to observe these magnificent and graceful creatures in their natural habitat. We look forward to welcoming you!

Walbeobachtungen

Whale Watching Hauganes ist der älteste Walbeobachtungs-Touranbieter Islands. Im Norden von Island, im Herzen der Bucht von Eyjafjörður, betreiben wir zwei klassische Island Eichenboote, die eine sehr komfortable und sichere Fahrt anbieten. Alle unsere Fahrten sind Kohlenstoffneutral, denn für jede Walbeobachtungsfahrt, pflanzen wir einen Baum, um den Verbrauch wieder auszugleichen. Auch unsere Boote laufen teilweise mit Biodiesel, das aus recyceltem Frittierfett hergestellt ist. Im Sommer 2021, lag unsere Walbeobachtungsquote bei 98%, inklusive Buckelwale, Minkwale, Schweinswale, Orca und Blauwale. Die Wale können von Hauganes aus mit dem Boot in ca. 20 Minuten erreicht werden. Sie werden nicht lange warten müssen, um diese großartigen und anmutigen Geschöpfe in Ihrem natürlichen Habitat zu erleben. Wir freuen uns darauf, Sie bald willkommen zu heißen!

Avistamiento DE BALENAS

Whale Watching Hauganes es la operadora de avistamiento de ballenas más antigua de Islandia. Localizado en el corazón de Eyjafjörður, al norte de Islandia, operamos con dos barcos islandeses de roble que ofrecen un viaje extremadamente cómodo y estable. Todas nuestras giras son neutrales en emisiones de carbono. Ej. plantamos 1 árbol por cada gira de avistamiento de ballenas, para compensar la cantidad de carbono equivalente a nuestras emisiones. Además, nuestros barcos de roble utilizan biodiesel, obtenido de aceite de cocina reciclado. En el verano de 2021, nuestra tasa de éxito de avistamientos fue de 98%, incluyendo ballenas jorobadas, Minkes, Marsopas de puerto, Orcas y ballenas azules. No esperarás mucho para observar estas magníficas criaturas en su hábitat natural. ¡Esperamos darle la bienvenida pronto!

Observation DES BALEINES

Whale Watching Hauganes est le plus ancien tour opérateur d'observation des baleines en Islande. Basé dans le nord de l'Islande, au cœur de la baie d'Eyjafjörður, nous utilisons deux bateaux en chêne traditionnels, qui nous permettent d'offrir une traversée stable et extrêmement confortable. Nous plantons un arbre pour chacune de nos excursions, rendant ainsi leur empreinte carbone neutre. Nos bateaux naviguent grâce à un approvisionnement partiel en biodiesel provenant d'huile de cuisson recyclée. 98% de nos excursions de l'été 2021 ont permis l'observation de baleines : baleines à bosse, baleines de Minke, marsouins, orques et baleines bleues. Les premières baleines sont visibles après 20 minutes de traversée depuis le village de Hauganes. Il ne vous faudra pas attendre longtemps pour voir ces magnifiques créatures pleines de grâce évoluer dans leur environnement naturel. Nous sommes impatients de vous les faire découvrir!

赏鲸

"Whale Watching Hauganes" 是冰岛最古老的一家提供观鲸服务的供应商。Hauganes位于冰岛的北部以及Eyjafjörður湾的中心。我们旗下的两艘质量卓越的冰岛橡木船，确保游客的每次出行都有着舒适安逸的体验。为了保障冰岛当地优美的自然环境，我们每次出船后，都会种植一棵绿树，以抵消航行所产生的碳排放。不仅如此，航线所用的部分燃料还是循环利用了厨房的烹饪用油。在夏季，我们的观鲸成功率高达 98%。你可以观赏到的鲸鱼种类，包括座头鲸，小须鲸，鼠海豚，虎鲸以及蓝鲸。从Hauganes渔村出发，前往观鲸初大概需要 21 分钟。你无需等待长途跋涉，就能观赏到这地球上庞大哺乳动物的曼妙身姿。

Carbon Neutral Tours

Breaching Humpback Whale

Did you know Humpback milk is 50% fat and pink in color.

ORKEY

VISTORKA
Akureyri Cleantech

Our tours are carbon neutral

Carbon emissions play an ever-increasing role in environmental issues such as climate change

With **our carbon neutral program**, conducted in accordance with and in cooperation with local authorities, we neutralize the carbon emissions, we create through **our special Whale Forest forestry plan**. To compensate for the amount of carbon equivalent to our emissions, we offset our carbon dioxide emissions by **planting one tree for each whale watching tour**. Besides, our oak boats run partially on biodiesel made from recycled cooking oil.

You can, therefore, be assured that **by travelling with Whale Watching Hauganes you minimize your carbon footprint**.

Good for you and of course fantastic for the environment!
